- Primary Focus on Maths and Physics

2005 - 2011
High School (Grade V to X)
M.V.Raman High School
Atmakur, Telangana

PROFILE INFO

IT graduate (B.Tech in Computer Science and Information Technology) and Android App Developer with strong skills across Linux, Windows, and Android environments. Experienced in supporting systems, analyzing issues, and ensuring smooth operations.
Worked as a Computer Teacher and Chief Lab In-charge at an international school, simplifying complex technical concepts and supporting users–building strong communication and problem-solving skills across various teams.
Currently pursuing CCNA Networking and DevOps CI/CD. Skilled in scripting fundamentals and data analysis using tools like Python, Excel, Access, and Power BI to monitor performance and derive insights.

WORK EXPERIENCE

Manager/Partner/Co-Founder
Hanay Technologies LLP **(Sep 2020 - present)**

- Founding Partner of Hanay Technologies LLP, contributing to the establishment and growth of the company.
- Managed recruitment activities as a recruiting manager, overseeing the hiring process and candidate selection.
- Organized and scheduled calls and meetings with international recruiting partners to foster collaboration and strengthen relationships.
- Acted as a liaison between the organization and Indian banks, facilitating payment settlements for both Foreign Inward and Outward remittances and ensuring smooth financial transactions.

Amazon India **(Jun 2023 - Dec 2024)**

- Worked as CS Associate (L2) and CS SDS Variable COGS - VAR for **United Kingdom Marketplace**.
- My daily tasks involved coordinating with Delivery Teams both from Delivery Service Providers(DSPs) and Independent Delivery partners such as Amazon Flex, speaking to customers and addressing their concerns on Shipping and Delivery related issues.
- Resolved delivery and logistics issues by coordinating with DSPs and Amazon Flex partners, while handling customer queries, refunds, payment issues, and Amazon Fresh-related cases.

LANGUAGES

- English
- Telugu
- Hindi

MY SKILLS & EXPERTISE

Linux and Bash

Android (via Kotlin)

Swift

Version Control using Git

Python

Photography

HTML / CSS

Computer Teacher and Lab In-Charge
Challenger International School **(Jun 2022 - Jun 2023)**

- Educated High School students about Operating Systems such as Windows and Linux and Microsoft Office Products such as Excel and Access as a regular curriculum teacher
- Acted as a **chief-designer for for Entire School Website to create UI** along with necessary Photography (my own kit) and incorporating vector graphics wherever needed using Canva
- Created Study Modules and Work Assignments for students.
- Maintained and Managed Lab Computers of various OS'es such as Linux and Windows including installation, updation and safe-purging as per school's policy.

Home Tutor
Urbanclap / now Urbancompany **(2018 - 2023)**

- Experienced hometutor specializing in subjects like **maths, physics, and chemistry.**
- Skilled in **planning and delivering lessons** to strengthen weak subjects and enhance skill development for kids from Grade VII to XII.
- Facilitated student learning through engaging discussions and reviewing class materials.
- Utilized interactive **3D models (self printed at my home)** to assist students in overcoming learning challenges.
- Implemented cutting-edge technology solutions to revolutionize the educational experience for students, fostering enhanced engagement and learning outcomes.

Photographer / Graphic Designer
Freelance / Side hustle / Gigs **(2017 - present)**

- Captured high-quality product photographs for a company specializing in bamboo products, ensuring visually appealing representations.
- Edited and color graded photos to meet specific website requirements, optimizing their visual impact and alignment with branding guidelines.
- Created logos and designed scalable vector graphics (SVGs) using tools like Canva and Adobe Illustrator, delivering professional and visually appealing designs.
- Edited infomercial videos and designed accompanying graphics for tech products, enhancing their visual presentation and promotional appeal.

PROJECTS

Projects I've built(fully finished) and have full ownership of, from concept and design to development and execution

DIGIPIN Converter (On Web)

DIGIPIN Converter is a web-based utility with responsive web-design(inspired by Google's Material Design) that allows users to convert DIGIPIN codes into geographic coordinates (latitude and longitude), and vice versa. It is designed specifically for locations within India, where the DIGIPIN system acts like a postal code—except it's far more precise, techy, and accurate.

- **Status:** Live and Open-Sourced, (First Commit: 16th June 2025)
- **Platforms:** HTML, CSS, and JavaScripts along with Google Maps API
- **GitHub Repository Link:** https://github.com/raghav-konk/RaghavDIGIPINConv/tree/main
- **Project Live Demonstration:** https://raghav-konk.github.io/RaghavDIGIPINConv/

Kymera QuizClip (Web and Android)

Its a Quiz Answering Interface built for students that are engaged in deep study especially using AI based LLMs(ChatGPT and DeepSeek) built using modern, interactive Approach. Mobile-friendly web app built for effortlessly selecting answers to multiple-choice questions (MCQs) generated by language models like ChatGPT – with style, sound, and swagger.

- **Status:** Live and Open-Sourced, (First Commit: June 2025)
- **Platforms:** Kotlin (for Android), HTML, CSS, and JavaScripts
- **GitHub Repository Link:** https://github.com/raghav-konk/QuizAppChatGPT
- **Project Live Demonstration (Web Version):** https://raghav-konk.github.io/QuizAppChatGPT/
- **Availability and Marketplaces:**
  - Approved and Live on Amazon AppStore (Targeted for Amazon FireHD Tablets based on AOSP). Developer account verified.
  - Google PlayStore: Live in beta-testing, In Internal Testing

TailScale Sharing

Project is Work-in-Progress

(Linux Based , kernel 5.1 and above)

Concept: Usually Tailscale VPN clients require their own app to be run on several devices, With this even non tailscale devices (such as but not limited to Samsung TV, PS5, Xbox where there is no way of installing tailscale will be able to take advantage of Tailnet devices spread across the globe.) Sort of creating a site-to-site VPN.

- ioT based (uses Raspberry Pi even a Pi Zero 2w, solely dedicated for this)

- **Status**: Conceptual Phase, Requires testing on older Linux Kernels
- **Platforms:** Dedicated Linux machine works even a Raspberry Pi Zero 2w because of its low power consumption.

School Website (UI Design & Project Ownership)

Led end-to-end design of a portfolio website, creating UI layouts in Canva and producing original visual content (**own photography**). Coordinated with a development team for implementation and delivery.

- **Status**: Finished and Website is live
- **Creation**: August 2022
- **Platforms:** Web (uses Responsive Web Design), Mobile-Friendly
- **Link:** https://cischoolonline.in/

HOBBIES (NON-MONETIZED)

- Photography
- 3D Printing
- Video Games
- Video Editing
- Mechanical Keyboards
- High Refresh Rate Displays
- Soldering Circuits (recent one)
- Electronics Repair
- Badminton
- Bicycling
- Carroms
- Self Hosting in Docker
- Virtual Reality
- ioT devices (Raspberry Pi)
- Lithium Batteries
- PCB's and Circuits (recent)
