PROFESSIONAL SUMMARY

IT graduate (B.Tech, Information Technology) with 5+ years of hands-on technical experience across Linux systems administration, networking, and full-stack web development. Proficient in Linux/Bash scripting, Python automation, Git version control, and Docker-based self-hosted infrastructure. Actively pursuing CCNA Networking certification and DevOps CI/CD practices, with practical project experience in IoT (Raspberry Pi), VPN configuration (Tailscale/site-to-site), and multi-OS lab management. Adept at troubleshooting complex technical systems and delivering reliable, automated solutions in fast-paced environments.

SKILLS

- OS & Systems: Linux (Ubuntu, Debian), Windows, Android/AOSP, Bash Scripting, Shell Automation
- Networking: TCP/IP, IPv4 and IPv6 DNS, VPNs (Tailscale, site-to-site), LAN/WAN Fundamentals, CCNA (In Progress)
- Containers & Infrastructure: Docker (self-hosted), Raspberry Pi, IoT Devices, Linux Kernel Configuration
- Version Control & CI/CD: Git, GitHub, CI/CD Concepts (In Progress – Jenkins, GitHub Actions, Ansible)
- Scripting & Development: Bash, Kotlin (Android), JavaScript, HTML/CSS
- Monitoring & Analytics: Power BI, Grafana, Access — system and operational data analysis
- Tools & Platforms: Google Maps API, Canva, Adobe Illustrator, Android Studio, VS Code
- Databases: Proficient in SQLite, MySQL, Access and Data Modelling with Excel and PowerBI

WORK EXPERIENCE

Work Links and Timelines (raghav-konk.github.io/experience.html)

Founding Partner & Operations Manager | *Hanay Technologies LLP* — *Sep 2020 – Present*

- Established and scaled company operations and internal technical infrastructure to support international business workflows, remote communications, and multi-currency financial settlements.
- Streamlined cross-border payment processing by acting as primary liaison between the organization and Indian banking partners for Foreign Inward/Outward remittances, reducing settlement turnaround time by ~25%.
- Orchestrated end-to-end recruitment operations, managing candidate pipelines and coordinating with international hiring partners across multiple time zones to expand team capabilities.

CS Associate L2 — SDS Variable COGS | *Amazon India* — *Jun 2023 – Dec 2024*

- Resolved complex delivery and logistics escalations for the UK Marketplace by coordinating with Delivery Service Providers (DSPs) and Amazon Flex partners, consistently maintaining SLA compliance across case queues.
- Triaged and resolved escalated customer cases involving shipping, payment disputes, refunds, and Amazon Fresh operations, improving first-contact resolution rates.
- Analyzed operational trends across daily delivery incidents to identify recurring failure patterns, feeding actionable insights back to logistics coordination teams.

Computer Teacher & Lab In-Charge | *Challenger International School* — *Jun 2022 – Jun 2023*

- Administered and maintained a multi-OS lab environment (Linux/Ubuntu, Windows) for 40+ machines, including OS installations, updates, patch management, and secure decommissioning per institutional security policy.
- Designed and deployed the school's live production website (cischoolonline.in) leading end-to-end UI/UX design and coordinating with the development team for on-schedule go-live delivery.
- Developed structured IT curriculum covering operating systems, Linux fundamentals, command-line tools, and Microsoft Office productivity suite for high school students across Grades V to IX.

PROJECTS

Published Project Links (raghav-konk.github.io/projectsbuilt.html)

TailScale Sharing (IoT / Linux / Networking) | *Work-in-Progress*

- Engineered a Raspberry Pi Zero 2W-based site-to-site VPN relay enabling non-native Tailscale devices (Samsung TV, PS5, Xbox) to access Tailnet resources globally — running on Linux kernel 5.1+ with minimal power consumption.

DIGIPIN Converter (Web Utility)

Live & Open-Source *github.com/raghav-konk/RaghavDIGIPINConv*

- Built and deployed a responsive web utility (HTML/CSS/JavaScript + Google Maps API) for converting DIGIPIN postal codes to geographic coordinates, purpose-built for the Indian postal system.

Kymera QuizClip (Android + Web App)

Live: Amazon AppStore & Google Play (Beta) | *github.com/raghav-konk/QuizAppChatGPT*

- Developed and shipped a cross-platform MCQ quiz application (Kotlin/Android + HTML/CSS/JS) integrated with AI-generated content (ChatGPT/DeepSeek); published on Amazon AppStore (AOSP) with Google Play beta in progress.

Personal Homelab | *Live and contained behind CG-NAT for security*

- Mostly use it for Plex Media Streaming and as a Tailscale node. Fully built around Linux.
- Run, Evaluate test and benchmark with Local LLM models with recent GPUs (nvidia and AMD) albeit consumer grade.

EDUCATION

- **Bachelor** of **Technology — Information Technology** — *2014 – 2018*
  Teegala Krishna Reddy College of Engineering and Technology, JNTU Hyderabad (CGPA: 57.43%)
- **High** School **and Pre-College (IPE) – Physics, Chemistry and Mathematics** — *2011 – 2013*
  Ascent Academy, Board of Intermediate Education, Telangana (Electronics and soldering as special interest) (CGPA:77.2%)
- **General Education (SSC)** — *2005 – 2011*
  M.V. Raman High School, Atmakur, Wanaparty, Telangana (CGPA: 86.3%)

CERTIFICATIONS / IN PROGRESS:

- Contribute to an Open-Source Project on Github (Completed)
- Code with Github Codespaces (Completed)
- Maintaining a secure repository using Github (Completed)
- CCNA Networking (Cisco — In Progress) • DevOps CI/CD Fundamentals (Self-Study, In Progress)
